Stay safe after a storm

- Stay Safe! Listen the radio and stay alert for additional storms.**
- Make sure everyone in the house is ok.**
- If you smell gas, turn off your gas supply at the meter.**
- Only use candles when necessary and keep a fire extinguisher handy.**
- Keep pets indoors. If you must take them out, keep them on a leash.**
- If you are using a generator, operate it outside away from windows and doors.**
- If you feel safe to venture outside, stay away from down power lines, tree limbs or anything else that could cause injury.**
- If you are able, check on neighbors.**
- Do not enter any buildings that have sustained structural damage.**
- Do not swim or wade into flood waters.**
- Do not drive unless necessary, give first responders and work crews room to do their job safely. If you do drive, do not try to drive through flood waters.**
